

CYDCOR FAMILY TREE

Updated Research Report

Reconstructing the owner-development, mentorship, company-launch, address-continuity, filing-infrastructure, and successor-identity network from early DS-Max/Cydcor history through the modern branches.

COMPILED	SCOPE	STATUS
September 6, 2026	Historical business genealogy / open-source research	Research phase substantially complete; open links preserved

IMPORTANT SCOPE NOTE

"Family tree" refers to a working genealogy of mentorship, employment, promotion-to-ownership, successor business identities, and repeated office-launch patterns. It does not mean Cydcor legally owns every company discussed. Cydcor describes a model involving independently owned sales companies. This report makes no finding of illegality or wrongdoing by any person or company.

This edition supersedes the September 1, 2026 narrative report. It incorporates the later evidence binder, branch dossiers, Illinois hub research, side-branch placements, cleanup-node research, and evidence-status corrections completed through September 6, 2026.

READING RULE

A company appears in this report because it was researched, not because it has been proven to be a direct Cydcor child. The evidence grade attached to each relationship controls the claim.

1. Executive Summary

This investigation began with a narrow question: where did Paletta Consulting come from, and how far upward could its organizational lineage be traced? By September 6, the project had expanded into a multi-generation study of independently owned outsourced-sales companies, owner-development patterns, corporate identities, exact-suite launch hubs, filing infrastructure, short-lived "fizzle" offices, and people who later opened new companies.

The strongest current high-level chain is:

MAIN WORKING BACKBONE

DS-Max / Avie Roth <-> Cydcor -> [Wiggins upstream still open] -> John Wiggins -> Brandie Park -> Michael Sessions -> [STRONG] Cody Staton / TRIEC -> Michael Lefeld / M4I / North 312 -> The League Global -> Thomas Watson / Paletta Consulting.

Two major evidentiary changes occurred after the September 1 report. First, the John Wiggins -> Brandie Park person-to-person bridge was upgraded from STRONG to CONFIRMED after a first-person transcript was recovered in which Brandie describes interviewing with "John," calls him "Mr. Wiggins," says he called her back, and places herself in his office months later. The exact employer-name lock to Black Diamond remains STRONG rather than confirmed. Second, the project expanded the modern side branches and resolved several previously unplaced nodes.

The League Global is now treated as a true modern branching hub rather than a simple Paletta predecessor. The project identifies Thomas Watson -> Paletta Consulting (confirmed), Michael Sanzone -> Brindle Consulting (strong), Danny Ra -> Perspective Development (confirmed), and Adam Lewis -> No Limit Solutions (confirmed).

The Illinois investigation produced two major Oak Brook launch clusters - 600 Hunter Drive #250 and 1211 W 22nd Street #905 - plus a separate CORConcepts / Impact Executives branch. The Atlanta investigation produced a strong 1145 Zonolite Road NE cluster, especially Suite 7, with Evolution Sales, ICON Sales Team, Monarch Sales, Wolfe Perseverance, and same-building Trinity Results activity.

The final cleanup pass also changed the status of several nodes that were unplaced on September 1: Ryckatyk now has a strong 3MP Atlanta predecessor through William Ryckman; Kevin Fuller now has a strong first-company continuity from C-Bus Voyage Marketing into ICON; Joseph Gills is confirmed as Integra's principal with Meghan Wilson strongly linked downstream to Wolf Management; and "OSP Connect" was corrected as a media/link label rather than a separate operating company, with the real company identified as One Source Provider.

Finding	Current assessment	Why it matters
Wiggins -> Brandie Park	CONFIRMED person link	Closes the key 1997 person bridge; employer-name lock remains separate.
Sessions -> Cody Staton / TRIEC	STRONG	Still the principal unresolved arrow on the main spine.
TRIEC -> Michael Lefeld	CONFIRMED	Direct person evidence plus exact-suite M4I handoff.
League -> Paletta / Perspective / No Limit	CONFIRMED	Shows a documented modern branching mechanism.
Lefeld orbit -> Brindle	STRONG	Adds a fourth League/Lefeld downstream branch.
1145 Zonolite cluster	VERY STRONG STRUCTURAL	Shows repeated modern office-launch activity in Atlanta.
Samantha Jackson / Meriam	FILING INFRASTRUCTURE	Useful discovery breadcrumb; never a

Finding	Current assessment	Why it matters
		mentorship arrow by itself.
Cleanup nodes	MIXED	Several upgraded; others intentionally remain open or directional.

This updated report is the narrative companion to the 256-page final investigation binder. The binder remains the controlling exhibit set for individual branch evidence and visual dossiers.

2. Research Question and Method

The working genealogical question remains: when a person later becomes the owner or principal of a new outsourced-sales office, what evidence identifies the office, leader, organization, or operating environment immediately above that person?

- Corporate records and business profiles: formation dates, officers, registered agents, historic names, assumed names, addresses, and dissolutions.
- First-person biographies and interviews: who hired whom, how someone entered the business, where they worked, and when they opened a company.
- Archived social media and recruiting material: recognition posts, management promotions, office-launch announcements, staff pages, client campaigns, and owner-development language.
- Address continuity: exact-suite or same-building chronology, always treated as corroboration rather than automatic proof.
- Cross-company personnel continuity: a person first appears in one office and later appears as founder, president, market director, or CEO of another.
- Filing infrastructure: recurring incorporators and registered-agent services are tracked as discovery infrastructure, not genealogy.
- Negative findings: if a company is relevant but the parent relationship is not defensible, it remains unplaced rather than being forced into the tree.

3. Evidence and Confidence Framework

Grade	Meaning	Typical evidence / use
CONFIRMED	Evidence sufficient for the specific stated link.	First-party statement, corporate/regulatory record, contemporaneous personnel evidence, or strong independent corroboration.
VERY STRONG / NEAR-CONFIRMED	Multiple strong pieces align; one ideal artifact is still missing.	Clean work chronology plus company launch; exact-suite handoff plus person link.
STRONG	Meaningful evidence supports the relationship, but a direct statement is absent.	Personnel history, timing, archive evidence, and/or exact-location continuity.
PROBABLE / RESEARCH LEAD	Plausible and evidence-based, but identity or lineage gaps remain.	Partial career history, incomplete archive, or continuity signal.
OPEN / UNPLACED	Relevant node; immediate parent or relationship is not established.	Kept searchable with no invented arrow.
IDENTITY CONTINUITY	Two labels appear to be the same operating identity or a successor/rebrand.	Not the same as parent-child genealogy.
FILING INFRASTRUCTURE	Formation-service or incorporator connection only.	Discovery aid; never mentorship evidence by itself.

INTERPRETATION RULE

An exact address, similar business model, shared client, filing agent, or anonymous review can strengthen a theory, but none of those facts alone proves training, ownership, or parentage.

4. Updated Master Working Tree

The main backbone is now more developed than it was on September 1. The Wiggins -> Brandie person link is confirmed; the central Sessions -> Staton arrow remains strong rather than confirmed.

Node / handoff	Status	Current safe formulation
DS-Max / Avie Roth <-> Cydcor	DOCUMENTED OVERLAP	A 2000 contract record places DS-Max, Cydcor, and Avie Roth in the same documentary structure; not a simple legal-rename claim.
Cydcor / older network -> John Wiggins	OPEN	Wiggins is a confirmed 1996 Black Diamond / Miami-hub node; immediate upstream owner remains unknown.
John Wiggins -> Brandie Park	CONFIRMED PERSON LINK	Brandie's first-person interview identifies John / Mr. Wiggins as the interviewer and call-back source.
Black Diamond -> Brandie employer identity	STRONG	Timing, Atlanta filing, and Wiggins align; transcript does not explicitly name Black Diamond.
Brandie Park -> Michael Sessions	CONFIRMED IN ARCHIVE	Sessions research notes say Brandie hired him and Sean Clark was his leader.
Michael Sessions -> Cody Staton / TRIEC	STRONG	9450 Bryn Mawr launch-window overlap; direct employment/promotion artifact still missing.
Cody Staton / TRIEC -> Michael Lefeld	CONFIRMED	TRIEC archive places Lefeld inside the organization.
TRIEC -> M4I / Lefeld	CONFIRMED SUPPORT	Exact 4849 N Milwaukee #407 handoff plus the person link.
M4I / North 312 -> The League Global	ORGANIZATIONAL CONTINUITY	Successive Lefeld organizational identities; not every change assumed to be a statutory rename.
The League Global -> Thomas Watson / Paletta	CONFIRMED	League advancement archive plus Paletta founder evidence.

4.1 Modern League branching

Prior node	Person	Later company	Assessment
The League Global	Thomas Watson	Paletta Consulting	CONFIRMED
M4I / North 312 / Lefeld orbit	Michael Sanzone	Brindle Consulting	STRONG
The League Global	Danny Ra	Perspective Development	CONFIRMED
The League Global	Adam Lewis	No Limit Solutions	CONFIRMED

5. Historical Root: DS-Max, Avie Roth, and Cydcor

5.1 Documented root

The 2000 Stamps.com market agreement and addendum remain the strongest historical root document. The agreement's notice structure references DS-Max International and Avie Roth, while Roth signs on behalf of Cydcor Limited as Vice President. The safe conclusion is documented overlap/continuity between DS-Max, Avie Roth, and Cydcor - not a claim that DS-Max simply changed its legal name to Cydcor.

5.2 Operating model

Cydcor's own history and FAQ materials describe a system in which Cydcor contracts with independently owned sales companies. Its 2019 history says the network grew from six independent sales companies at the beginning to more than 375 by its 25th anniversary. This operating model explains why a genealogical owner-development map is useful, but it does not identify any specific parent relationship by itself.

5.3 Remaining upstream problem

The investigation has reached the early Cydcor / DS-Max ecosystem and a confirmed Miami launch hub, but the identity of John Wiggins' immediate upstream owner remains open.

6. The 2263 NE 164th Street Miami Cluster

6.1 Confirmed hub

The North Miami Beach address is a confirmed recurring sales/distribution hub from 1993 through 1999. It contains Direct Books of Miami / Larry Lay, R.U. Reads / Rego Posada, Can-Am-related material / Brandon Snowsell, Golden Shores / Adam Stender, Black Diamond Advertising / John Wiggins, C & M Direct / Cecil Steele, and a Top Flight-related lead / Carl Foss.

6.2 Research discipline

The address chronology places Wiggins in an older multi-company environment. It does not justify a mentor chain among Larry Lay, Rego Posada, Wiggins, Cecil Steele, or the other principals. Internal genealogy remains open.

7. John Wiggins and the Brandie Park Bridge

7.1 Evidence upgrade after September 1

A first-person transcript recovered during the later branch work changes the person-to-person arrow. Brandie recounts a first-round interview with "John," later addresses him as "Mr. Wiggins," says John called her back, and describes being back in his office months later after the morning meeting. That is sufficient to upgrade Wiggins -> Brandie to CONFIRMED as a person link.

7.2 Black Diamond employer identity

Georgia corporate records place John Wiggins and Black Diamond Advertising together in Atlanta by late 1996, before Brandie's 1997 entry. The transcript does not itself say "Black Diamond Advertising," so the employer-name lock remains STRONG rather than confirmed.

7.3 Upstream remains open

The confirmation of Wiggins -> Brandie makes the older unanswered question more precise: who developed Wiggins before Black Diamond?

8. Brandie Park: Marketing Endeavors, AGI, Aurora, and Owner Development

8.1 Marketing Endeavors

Brandie's own account places her in a commission-based B2B utility sales environment beginning in 1997, followed by a move from Atlanta to Charlotte to open an AT&T outside-sales firm. Corporate research identifies Marketing Endeavors in the matching 1999 Charlotte/Atlanta period.

8.2 Adam Dorfman / DMC Atlanta

Adam Dorfman's first-person account remains one of the clearest owner-development examples in the project: he says Marketing Endeavors was owned by Brandie, that she trained and developed him, and that she supported his July 2003 business launch.

8.3 AGI / Aurora

Brandie later appears in AGI Atlanta and Aurora-era organizations. The report treats these as organizational continuity/context unless a specific legal identity is established. The Hannah Hoffman / South branch is tracked separately below.

8.4 Scale

Aurora-era public material describes Brandie as having been responsible for more than 200 branch sales offices nationally. That figure is treated as background on scale, not as proof of any specific parent arrow.

9. Michael Sessions: Oxford, Marketing Sessions, MCS2, and 600

9.1 Brandie -> Sessions

Research notes preserve Michael Sessions saying Brandie hired him and Sean Clark was his leader. The relationship remains CONFIRMED IN ARCHIVE; the exact audio/timestamp should still be preserved in the source packet.

9.2 Oxford

Sessions described opening his first company around Halloween 1999 in the Philadelphia area. Oxford Marketing Solutions in Narberth has a November 1, 1999 business-start date, closely matching that autobiographical timing. The archive also places the organization on a Quill campaign by 2001.

9.3 Illinois corporate/operating continuity

The later Sessions line includes Trans World Marketing, Marketing Sessions, MCS2, and 600 / 600 Global. The report treats these as organizational/legal continuity within the Sessions line rather than as separate child branches.

9.4 600 Hunter launch environment

MCS2's Oak Brook presence at 600 Hunter Drive #250 becomes important because Keynorth Consulting, Midwest Client Consultants, and Chicago Business Strategies also form or operate from the same exact suite during the 2009-2011 period.

10. The Sessions -> Staton / TRIEC Bridge

10.1 What is documented

TRIEC Group began August 16, 2011 under Cody Staton. Its address history includes 9450 Bryn Mawr, 8770 W Bryn Mawr, and 4849 N Milwaukee Avenue #407. The Sessions organization is separately placed at 9450 Bryn Mawr in the same 2011 launch period.

10.2 Current conclusion

Sessions -> Staton remains STRONG. The exact-location and launch-window overlap is highly significant in this owner-development context, but the report still does not state as fact that Cody worked for Michael Sessions because the direct employment/promotion artifact has not been recovered.

10.3 Single best closure artifact

A contemporaneous resume, staff page, promotion announcement, payroll/employment record, or interview explicitly naming Cody's pre-TRIEC office would upgrade this arrow.

11. TRIEC -> Michael Lefeld and the Clear Vision Crossover

11.1 TRIEC -> Lefeld

Archived TRIEC social material places Michael Lefeld inside TRIEC, including a January 2013 sales-recognition artifact. This person evidence is why the later same-suite handoff is more than address similarity.

11.2 TRIEC -> M4I

TRIEC is documented at 4849 N Milwaukee Avenue #407; 2013 M4I filing research places Lefeld's company at that same exact suite. Together, the person link and suite transition create confirmed support for the owner-line handoff.

11.3 Clear Vision crossover

A company-attributed August 18, 2014 release names Cody Staton, Michael Lefeld, and Meshak Faton as managing partners at Clear Vision Communications. Clear Vision is treated as a later management crossover beside the main lineage - not as evidence that TRIEC became Clear Vision or that Clear Vision replaced M4I as the parent.

12. M4I -> North 312 -> The League Global

12.1 Organizational continuity

M4I, North 312, and The League Global are treated as successive identities in Michael Lefeld's organizational line. The exact statutory mechanism of every transition is not assumed.

12.2 Modern Cydcor anchor

Cydcor publicly identifies Lefeld and The League Global inside its independent-sales-company contracting model. This is the strongest direct modern confirmation that the League node belongs in the Cydcor ecosystem.

12.3 Itasca hub

The League Global operates at 500 Park Blvd, Suite 1475, Itasca. Paletta and Brindle also appear at 500 Park Blvd; this is modern corroborating address continuity rather than automatic lineage proof.

13. The League Global Downstream Branches

This was underrepresented in the first website draft but is explicit in the underlying research. The League/Lefeld orbit is one of the best modern examples of multiple later owners emerging from a single development environment.

Person	Prior node	Later company	Assessment	Key point
Thomas Watson	The League Global	Paletta Consulting	CONFIRMED	League advancement archive + Paletta founder history; May 2024 launch.
Michael Sanzone	M4I / North 312 / Lefeld orbit	Brindle Consulting	STRONG	Prior-office evidence + CEO identity + same 500 Park Blvd building.
Danny Ra	The League Global	Perspective Development	CONFIRMED	League archive + current founder/CEO evidence.
Adam Lewis	The League Global	No Limit Solutions	CONFIRMED	League archive + later founder evidence.

WEBSITE IMPLICATION

The public site should display The League Global as a branching hub with Paletta, Brindle, Perspective Development, and No Limit Solutions - not as a one-child path.

14. Illinois Launch Hubs, Fizzles, and Branch Generators

14.1 600 Hunter Drive #250

The 600 Hunter Drive #250 Oak Brook cluster is one of the strongest structural launch environments in the Illinois research. MCS2 / Michael Sessions is present there; Keynorth Consulting / Rebecca Blatz formed there in 2009; Midwest Client Consultants / Shaine Thurman formed there in May 2010; and Chicago Business Strategies / Bryan Shaw formed there in February 2011.

The safe interpretation is a strong launch hub tied to the Sessions/MCS2 environment. Direct pre-launch personnel artifacts for Blatz, Thurman, and Shaw would be required to convert the hub inference into fully confirmed individual mentorship arrows.

14.2 1211 W 22nd Street #905

The second-stage Oak Brook cluster includes Keynorth, Chicago Business Strategies, Red Bay / Rebecca Blatz continuity, and later Three Point Executives / Stevan Ivanisevic at the exact Suite 905 address. Quill appears as a recurring campaign marker. Three Point lasted roughly 17 months and is treated as a genuine fizzle; its immediate trainer/owner remains open.

14.3 CORConcepts -> Impact Executives

CORConcepts / Gabrielle Corcoran is independently tied to Cydcor in surviving career material and to Quill / Verizon FIOS campaigns. Adam Balsinger is placed at CORConcepts before becoming president of Impact Executives. Impact operated from the same/near-exact Orleans Street suite and dissolved after about 2.5 years, making it another genuine fizzle branch.

14.4 Branch-generator leads

Two later owner leads emerge from the CORConcepts environment: Chrysanthi Halkiotis -> Vivid Marketing and Kevin Smith -> KCS Concepts. These remain research targets rather than fully developed dossiers.

14.5 Midwest continuity

Midwest Client Consultants lasted far longer than the genuine fizzles. Its continuity research includes the operating/assumed names Energy United, Stone North, Launch, and Infinite; a probable Stone North -> Stone Full relationship; and a Great Lakes Energy corroboration node. The exact post-2024 legal vehicle behind the surviving brand continuity remains open.

15. Samantha Jackson / Meriam Filing Infrastructure

Samantha Jackson and Meriam Corporate Services appear repeatedly in the formation records of companies that became useful branch targets. This role must remain structurally separate from owner genealogy.

Verified/project-preserved examples include Midwest Client Consultants (Illinois), Supreme Management Group (West Virginia), MBA Direct and Birmingham Business Acquisitions (Alabama, secondary corporate records in the project), NX Direct / ABC Consultants Group (Georgia), and related formation work.

CRITICAL CONTROL

Samantha Jackson is not treated as the owner, mentor, or parent of these companies merely because she appears as incorporator, organizer, or registered-agent infrastructure. Her value is as a breadcrumb for discovering new offices.

16. Bluefield Branch

Supreme Management Group / Marcus Mack is the filing-confirmed Bluefield starting node. The preserved downstream lead is Marcus Mack -> John Palmer / Wes Palmer -> NXT Level Solutions. The branch remains an archive lead because each direct handoff still needs its own employment/promotion artifact.

17. Birmingham Branch

MBA Direct / Michael Figueroa is the predecessor node; Birmingham Business Acquisitions / Alphonso Johnson follows in the development sequence; Kevin Richardson / Limitless Marketing Group is the downstream lead. Figueroa -> Johnson is stronger than the later BBA -> Richardson handoff, which still needs the exact promotion record.

18. ABC / NX Direct Branch

NX Direct is the strongest structural predecessor to ABC Consultants Group / Angel Jacome. Corporate records place NX Direct and later ABC in the same Tower Creek Parkway suite environment, with Samantha Jackson appearing in the formation infrastructure. The exact Angel-at-NX employment artifact remains the main person-level gap.

19. Brandie / AGI -> South -> Cape Reserve

The research preserves a strong person-continuity branch from the Brandie/AGI ecosystem to Hannah Hoffman / South Inc., then from South to Justin Hageman / Cape Reserve. Both handoffs are strong but still benefit from preservation of the original AGI and South personnel artifacts.

20. Atlanta 1145 Zonolite / ICON Cluster

The strongest modern Atlanta structural cluster centers on 1145 Zonolite Rd NE, especially Suite 7. Evolution Sales / Jonah Mead-Vancort appears there in 2022; ICON Sales Team / Kevin Fuller appears there in 2023; Monarch Sales / JP Ellis appears there in 2024; Wolfe Perseverance / Lillian Wolfe is part of the same Suite 7 branch environment; Trinity Results also launched in the same building without a preserved suite number. Exact-suite succession is treated as structural evidence, while person links are graded separately.

21. Sky Inc. Downstream Branches

Sky Inc. / Jonathan Perry is the upstream node for two researched branches. Hannah Hasinski -> Ignite Marketing Group is archive/strong. Victoria Wilegus -> Providence Avenue has a locked downstream identity but only probable upstream Sky evidence because the original named Sky-era artifact still needs preservation.

22. Riverfront -> Gateway -> W1N

Daniel Giannone's public career sequence places him at Riverfront Marketing before Gateway Sales Consulting, then as founder/leader of W1N Sales. Gateway -> W1N is strong downstream continuity. Riverfront -> Gateway is a strong career-sequence lead, but the parent/owner above Riverfront remains unresolved.

23. 5 North / North -> Patricia Graells -> Ibericus

A New York regulatory filing places 5 North within a Cydcor channel structure. Patricia Graells' career profile places her at North / 5 North before and overlapping the 2016 launch of Ibericus. Ibericus identifies Patricia as founder/president/CEO. The branch is strong / near-confirmed; the best upgrade would be a first-party 5 North promotion or staff artifact.

24. W1N -> Trinity Results

Trinity Results identifies Caylie Surrena as leader and is legally anchored in Atlanta in 2024. Public personnel evidence places Caylie with W1N Sales beforehand. The resulting W1N -> Caylie -> Trinity branch is strong / near-placed, with exact W1N dates/title still the main missing artifact.

25. Banquet Executives / Peyton Timmermeyer

Banquet Executives is a real direct-sales operation with Amazon Business B2B campaign evidence and promotion/leadership language. Peyton Timmermeyer is publicly associated with the company, but the project did not recover a defensible immediate parent office or a full pre-Banquet chronology. It remains an active open node.

26. Evolution Sales -> First Coast Sales Group

Evolution Sales / Jonah Mead-Vancort is legally anchored at 1145 Zonolite Rd NE Suite 7 in 2022. Employee material shows direct B2C / AT&T Fiber-style work and management development. Jonah later formed First Coast Sales Group in Florida in 2025, producing a confirmed downstream branch. LJC Business Partners is retained only as a research lead from an employee chronology, not as Jonah's proven parent.

27. Broad Street / Philadelphia Marketing Executives / Jordan Mitchell Group

BBB and directory evidence show Broad Street Marketing and Philadelphia Marketing Executives as a combined Blue Bell operating identity. A later employee record pairs Broad Street with Jordan Mitchell Group, supporting probable successor continuity. The branch is an identity-continuity node; its original founder/parent above the Blue Bell office remains open.

28. Walker Marketing -> 524 Executives

Walker Marketing & Consultants / Brandon Walker is an Ohio outsourced-sales/marketing company with a documented operating history. The project preserves Walker -> 524 Executives as identity continuity / archive strong. The original legal name-change or successor artifact remains the desired upgrade.

29. Rockland -> Andrew Breuninger -> Jonathan Wesley

Rockland Incorporated is documented in Troy, Michigan with Andrew Breuninger and a historical T-Mobile context. Later first-party Jonathan Wesley releases identify Andrew as president. Because Jonathan Wesley describes itself as founded in 2003 while Rockland is documented in 2011, the safe chain is person continuity through Andrew - not a simple Rockland -> Jonathan Wesley legal succession.

30. Joseph Gills / Integra -> Meghan Wilson -> Wolf Management

Joseph Gills is confirmed as Integra Sales Associates' president/CEO and the St. Louis company is anchored to a July 2019 start/incorporation. Integra's own materials describe face-to-face B2B acquisition, advancement, and leadership development. Multiple public traces place Meghan Wilson inside the Integra environment before Wolf Management, whose own site identifies her as President & CEO. The downstream branch is strong / near-confirmed; Joseph's pre-Integra office remains open.

31. Final Cleanup Nodes: C3, GES, Ryckatyk, Kevin Fuller, OSP

The cleanup pass intentionally separated nodes that could be placed from nodes that could not. C3 Orlando remains unplaced; GES Consulting Enterprise remains a strong Cydcor-directional lead with a Southern California parent question; Ryckatyk was upgraded to a strong 3MP Atlanta -> William Ryckman -> Ryckatyk sequence; Kevin Fuller was upgraded through C-Bus Voyage Marketing -> Kevin Fuller -> ICON Sales Team; and OSP Connect was corrected as a media/link label rather than a separate company, with One Source Provider retained as a parallel direct-sales platform showing strong Cydcor personnel overlap but no proven founder-lineage.

Cleanup node	Disposition	Key remaining question
C3 Orlando	UNPLACED	Named founder/principal and immediate predecessor.
GES Consulting Enterprise / Brian Lee	DIRECTIONAL	Brian Lee's pre-GES Southern California employer; Cydcor allegation remains secondary.
Ryckatyk / William Ryckman	UPGRADED	Preserve a first-party 3MP promotion or Ryckatyk launch artifact.
Kevin Fuller / C-Bus Voyage / ICON	UPGRADED	Identify Kevin's employer/trainer immediately before C-Bus Voyage.
Joseph Gills / Integra	UPGRADED principal	Immediate pre-2019 office remains open.
OSP Connect	CORRECTED	Not a separate operating company; One Source Provider is the real node.

32. Address-Hub Summary

Address continuity is one of the project's highest-yield tools, but the report distinguishes hub evidence from genealogy. The current comprehensive index tracks eight major hubs.

Hub	Location	Period / status	Assessment
2263 NE 164th St hub	North Miami Beach, FL	1993-1999	Confirmed hub
600 Hunter Dr Suite 250 hub	Oak Brook, IL	2009-2011	Strong launch hub
1211 W 22nd St Suite 905 hub	Oak Brook, IL	2012-2016	Confirmed cluster
9450 Bryn Mawr hub	Rosemont / Des Plaines, IL	2011	Strong
4849 N Milwaukee Ave Suite 407 hub	Chicago, IL	2012-2013	Very strong / confirmed support
500 Park Blvd hub	Itasca, IL	Modern	Modern corroboration
750 N Orleans Suite 001 / 1 hub	Chicago, IL	2006-2012	Strong address corroboration
1145 Zonolite Rd NE Suite 7 hub	Atlanta, GA	2022-2024+	Very strong structural cluster

33. Chronological Timeline

Date / period	Event	Research significance
1993	Direct Books / Larry Lay at 2263 NE 164th St	Earliest identified Miami-hub node.
1994	R.U. Reads at same address; Cydcor established	Miami hub overlaps the Cydcor founding era.
1996	Black Diamond / John Wiggins in Miami, then Georgia authority	Places Wiggins in older hub before Brandie's entry.
1997	Brandie Park enters through John Wiggins interview	Person link now confirmed.
1999	Marketing Endeavors period; Oxford Marketing Solutions opens	Brandie owner node and Sessions first-company launch.
2000	DS-Max / Avie Roth / Cydcor contract overlap	Historical root anchor.
2001	Sessions organization on Quill campaign	Client/campaign marker.
2003	Adam Dorfman opens DMC Atlanta with Brandie's support	Clear owner-development example.
2009-2011	600 Hunter #250 cluster	Keynorth, MCS2, Midwest Client Consultants, Chicago Business Strategies.
Aug. 2011	TRIEC begins under Cody Staton	Middle-chain formation point.
2011	Sessions-era operation and TRIEC overlap at	Strong Sessions -> Staton evidence.

Date / period	Event	Research significance
	9450 Bryn Mawr	
2012-2013	Lefeld appears at TRIEC; M4I moves into TRIEC Suite 407	Confirmed person + exact-suite handoff.
2013	M4I / North 312 / League line; South begins	Lefeld owner line and Brandie/AGI side branch.
2014	Clear Vision names Cody Staton and Mike Lefeld as managing partners	Later crossover, not parent replacement.
2015-2016	ABC / NX and Three Point periods	Georgia exact-suite continuity; Illinois fizzle.
2017-2018	Brindle, GES, Ryckatyk predecessor period	Modern side-branch expansion.
2019	Integra founded under Joseph Gills	St. Louis node above later Wolf branch.
2022	Evolution Sales at 1145 Zonolite Suite 7	Atlanta modern launch cluster begins.
2023	ICON Sales Team at same Suite 7	Kevin Fuller second-company launch.
2024	Monarch Sales at Suite 7; Paletta founded; Trinity filing	Multiple modern downstream launches.
2025	First Coast Sales Group filed	Confirmed downstream Jonah branch.
2026	Research freeze / public website preparation	35 curated dossiers, comprehensive searchable inventory, open links preserved.

34. Evidence Matrix

The matrix below is intentionally broader than the September 1 matrix. It includes the main spine and the most consequential side-branch/continuity relationships.

Relationship	Branch	Current status
DS-Max / Avie Roth -> Cydcor	Historical root	Documented overlap
Cydcor / older network -> John Wiggins / Black Diamond	Main backbone	Probable / open
John Wiggins / Black Diamond -> Brandie Park / Marketing Endeavors	Main backbone	Strong
Brandie Park / Marketing Endeavors -> Michael Sessions	Main backbone	Confirmed in archive
Brandie Park / Marketing Endeavors -> Adam Dorfman / DMC Atlanta	Brandie branch	Confirmed

35. Open Questions and Next Research Targets

Area	Single highest-value target
Main backbone	Recover a direct Cody Staton pre-TRIEC employment/promotion artifact naming the Sessions organization.
Wiggins upstream	Identify John Wiggins' immediate pre-Black Diamond owner or office; the Miami hub itself is confirmed, internal mentor order is not.
Brandie -> Sessions source preservation	Preserve the exact Sessions audio/timestamp or transcript that states Brandie hired him and Sean Clark was his leader.
600 Hunter personnel	Find any Blatz / Thurman / Shaw pre-launch personnel record naming the Sessions/MCS2 environment.
League / Paletta preservation	Preserve the best pre-May-2024 League advancement artifact naming Thomas Watson.
Three Point	Identify Stevan Ivanisevic's immediate trainer/owner before Three Point.
Bluefield	Preserve each Marcus Mack -> Palmer(s) -> NXT handoff.
Birmingham	Preserve Figueroa -> Johnson and BBA -> Richardson/Limitless handoffs.
ABC / NX	Recover the Angel Jacome employment/promotion record inside NX Direct.
Gateway	Identify the parent above Riverfront / Gateway, not merely the Daniel career sequence.
Banquet	Recover Peyton Timmermeyer's full pre-Banquet work history.
GES	Recover Brian Lee's immediate Southern California predecessor office.
Integra	Recover Joseph Gills' pre-July-2019 sales office.
C3 Orlando	Identify a named founder/principal and predecessor office.
Identity nodes	Recover original legal/rebrand artifacts for Walker -> 524 and Broad Street / PME -> Jordan Mitchell.
Kevin Fuller	Identify the sales office/trainer before C-Bus Voyage.
OSP	Identify Dean Elali's older network-marketing chapter or an early 2011 launch/campaign artifact if available.

36. Conclusions

By September 6, the investigation supports a coherent multi-generation owner-development model rather than a collection of unrelated companies that merely use similar recruiting language. The modern Paletta / League portion is particularly strong: Cydcor publicly anchors The League Global inside its contracting model; Lefeld is confirmed at TRIEC before his owner line; League produces multiple later owner branches; and Paletta is one of several downstream outcomes rather than the sole descendant.

The historical backbone is also materially stronger than it was on September 1 because Wiggins -> Brandie is now confirmed as a person link. The main unresolved middle arrow remains Sessions -> Cody Staton / TRIEC. The 9450 Bryn Mawr launch-window overlap makes the relationship strong, but the report continues to refuse the unsupported statement that Cody worked for Sessions until a direct artifact is found.

The Illinois and Atlanta hub research demonstrates another important point: office genealogy is not only visible in biographies. Repeated exact-suite launch sequences, especially when paired with people moving from employee/manager roles into founder/president roles, can expose branch structure. At the same time, this report deliberately separates address hubs, identity continuity, filing infrastructure, and true parent/child genealogy.

The broader network is now represented through multiple kinds of evidence: confirmed parent-to-owner branches, strong person continuity, exact-suite structural clusters, rebrand/identity continuity, filing infrastructure, and open research nodes. This is the correct way to publish the findings: everything researched is included, but every item retains the evidence status the record actually supports.

CURRENT BEST FORMULATION

DS-Max / Avie Roth <-> Cydcor -> [Wiggins upstream open] -> John Wiggins -> Brandie Park -> Michael Sessions -> [STRONG] Cody Staton / TRIEC -> Michael Lefeld / M4I / North 312 / The League Global -> multiple downstream owner branches including Paletta, Brindle, Perspective Development, and No Limit Solutions - with additional independent side branches and launch hubs documented elsewhere in this report.

Appendix C. Source and Research-Archive Guide

The September 1 report used public-source labels S1-S25 and archive labels RA1-RA15. The September 6 investigation expanded beyond those labels into 35 curated visual dossiers plus additional public-source verification. The final investigation binder is the controlling exhibit packet for these later findings.

C.1 Core public-source families preserved from the September 1 report

- Cydcor history / FAQ / business-model materials, including the Michael Lefeld / The League Global profile.
- 2000 Stamps.com / Cydcor agreement and addendum involving Avie Roth and the DS-Max notice structure.
- VoyageATL and other first-person profiles for Brandie Park and Adam Dorfman.
- BBB and corporate/business profiles for Oxford, TRIEC, Brindle, South, and other company nodes.
- The League Global, Paletta, Perspective Development, No Limit Solutions, Sky, Cape Reserve, and other first-party company pages.
- Florida, Illinois, Georgia, Alabama, West Virginia, and other corporate filing records used for legal identity, officers, addresses, incorporators, and dates.

C.2 Research-archive families

- Sessions corporate-name / address history and 9450 Bryn Mawr transition.
- TRIEC social archive placing Michael Lefeld inside the office.
- M4I / North 312 / League continuity and League advancement archive.
- Icon / Sky / AGI / South personnel and social archives.
- Bluefield, Birmingham, ABC/NX, and other branch-development records.
- Later cleanup research covering GES, C3, Ryckatyk, Kevin Fuller, Integra, OSP, Riverfront, First Coast, and identity-continuity nodes.

C.3 Controlling companion documents

- Final Investigation Binder - September 6, 2026 - 256 pages / 35 curated dossiers.
- Master Investigation Index - September 3, 2026 - entity, relationship, address-hub, and research-gap control sheets.
- Comprehensive public website research index - updated September 6, 2026 - designed to include confirmed, strong, probable, open, identity-continuity, filing-infrastructure, and corrected nodes.

PUBLICATION NOTE

The narrative report should be cited together with the final binder when a claim depends on a specific archived screenshot, filing image, or branch exhibit. The binder is more granular; this report is the integrated narrative.
